

# Welcome to Narsarsuaq Airport

Narsarsuaq Airport is ideally situated in the southern Greenland for a number of routes between America and Europe. The airport is the only international airport in southern Greenland and the settlement it serves is small, with the airport primarily functioning as a transfer point for passengers heading for the helicopter sites in Qaqortoq and Nanortalik.

The first airport was built in Narsarsuaq as an army airbase during the US operations in 1941 under the name of Bluie West One. The US Air Force left Bluie West One in November 1958 and the airport is now named Narsarsuaq Airport.

In the 1950s, transatlantic civilian flights began using the air base for refueling. This use fell off in the 1960s as airliners gained greater range, but the base became the

hub of domestic traffic. In recent years Narsarsuaq has an increasing role as hub for international cargo and ferry traffic.

Greenland Airports operate the Narsarsuaq Hotel with 70 rooms, bar and restaurant near the airport. The area is famous for its Viking settlements and hiking opportunities. For more information about tourism in Narsarsuaq please visit: [www.greenland.com/en/destinations/south-greenland/narsarsuaq/](http://www.greenland.com/en/destinations/south-greenland/narsarsuaq/)
