

# Welcome to Kangerlussuaq Airport

Kangerlussuaq Airport is the largest Airport in Greenland. It is situated at the end of the fjord Kangerlussuaq in central-western Greenland and it benefits from a stable inland climate. Kangerlussuaq Airport is the international hub for commercial and passenger airfare in Greenland and as such it is the most well equipped airport in Greenland.

Kangerlussuaq Airport dates back to 1941 under the name of Blue West-8, later renamed Sondrestromfjord Air Base and Sondrestrom Air Base. The runway is 2810 meters – a 1.51% upslope first 900 M RWY 09 may cause optical illusion of a shorter runway.

In the 1950s, transatlantic civilian flights began using the air base for refueling. This use decreased in the 1960s as airliners gained greater range, but the base became the hub of domestic air traffic and also for smaller airplanes crossing the Atlantic. The airport was handed over to Greenland Airports in 1992. Hotel Kangerlussuaq, with a

70-room capacity and a restaurant, is located within the terminal building of the airport, providing accommodation for transferring passengers and personnel. The Hotel is owned by Greenland Airports. Visit [www.hotelkangerlussuaq.gl](http://www.hotelkangerlussuaq.gl) for more information.

Other amenities include a night-club and a cafeteria, restaurant and bar. Several tourism outfitters share an office in the terminal, alongside the Tourist Office. For more information on tourism in Kangerlussuaq see: [www.greenland.com/en/destinations/arctic-circle-region/kangerlussuaq](http://www.greenland.com/en/destinations/arctic-circle-region/kangerlussuaq)

## Opening hours

**Mon-Sat:** 1100-2000 (1000-1900)\* UTC EXC SUN/HOL. Outside hours of service PPR MNM 9 HR (within opening hours).

\*From first Sunday in March until last Saturday incl. in October
